## Another Log

Posted by shorebird - 2008/03/01 00:13

---

I need guidance on what, if any, needs to be removed.

---

uninstall the following software:

C:\Program Files\AzureBay\AzureBay Screen Saver\WPChanger.exe

-----  
fix this setting:

HKCU\..\Main, Start Page = <http://httpwww.google.com/>

post your log, thank you
