
need some help please...V.TRJ.Rootkit_core...

Posted by kangsoos - 2008/03/04 00:19

hi,

i'm a newbie to this site and i need some help with my freefixer scan results (what to keep and what to delete). my computer is very slow to bootup, ads keep popping up when using IE, and when i start my computer work offline box always appears. i've done scans with my virus software and it keep telling me i have this trojan (V.TRJ.Rootkit_core). i've fixed it many times but the problem is not going away.

any help would by much appreciated.

attaching my freefixer scan log.....

thank god for this site....hope i can get my cpu back to a normal state :(

Dear Kangsoos

I am off in some local important tasks, so my online activity is currently limited to more of my company things,

I will refresh myself periodically by coming in forums frequently from now

use BITDEFENDER with INTERNET EXPLORER:

<http://www.bitdefender.com/scan8/ie.html>

remove, what it says, it is an online antivirus

Install SPYBOT software, update definitions and then scan and remove what it says:

<http://projects.securitywonks.net/projects/details.php?file=2>

post the latest log after that,

am sorry, incase, if I am late,
