
RunDLL32 Problem After FreeFix scan

Posted by bria - 2008/08/16 20:52

Hello everyone! On my (Dell Inspiron Vista Home) laptop, I ran freefixer and accidentally deleted SOMETHING but I don't know what. Now it keeps saying "Window program Rundll32 has stopped working" and Firefox won't work. I don't know what I deleted and I don't know how to fix it. Can anyone help? Thanks!
